

## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

### Monitoring Requirements Not Met for City of St. Anthony

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards.

During the November 2009 monitoring period we did not complete all monitoring or testing for Bacteria and, therefore, cannot be sure of the quality of our drinking water during that time. Even though this is not an emergency, as our customers, you have a right to know what happened and what we did to correct this situation.

#### What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for, how often we are supposed to sample for coliform and ecoli and how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were taken
Coliform	5 samples/mo.	4	November 2009	November 2009
Ecoli	5 samples/mo.	4	November 2009	November 2009

#### What is being done?

The correct amount of samples will be taken in the future.

For more information, please contact Kirk Nelson or Kathy Brokens at 624-3494 or 420 N. Bridge, Ste. A, St. Anthony, ID 83445.

*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*

This notice is being sent to you by the City of St. Anthony. State Water System ID#: 7220067. Date distributed: 12/12/2009.
